As a software engineering student from Edinburgh Napier University with extensive internship experience in software development and business analysis, I am looking to start my career in the financial services industry. I am ideally looking for a business analyst / product owner or software developer position, I am happy to travel or relocate for this role.

EXPERIENCE

JUNE 2019 – AUGUST 2019

BUSINESS ANALYST INTERN, MARKETAXESS

Produced high level and detailed business specifications. Gained a detailed understanding of the MarketAxess trading platform. Participated in Scrum as a product owner and prioritized work items for developers.

JUNE 2018 – MAY 2019

TECHNOLOGY ANALYST (INDUSTRIAL PLACEMENT), MORGAN STANLEY

12 months split across Equity Swaps Trading and Morgan Stanley Developer Environment teams. Performance tuned Java and SQL components on a market leading trading system. Migrated and enhanced a client feature from Perl scripts to a Java Spring Boot application. Full stack software development with Java Spring Boot, Python and JS + Angular 6

EDUCATION

SEPTEMBER 2016 - NOVEMBER 2020

BENG (HONS) SOFTWARE ENGINEERING, EDINBURGH NAPIER UNIVERSITY

A wide variety of modules covering the analysis, design, development, testing, evaluation and modification of reliable, maintainable and high-quality software including real-time, mobile and large-scale enterprise systems.

SEPTEMBER 2014 – AUGUST 2016

A-LEVELS, BOSTON COLLEGE (UK)

A-Levels in Math's, Further Math's and Economics. IELTS (Academic) 8.0

SKILLS

- Able to work well as part of a team or independently
- Excellent written and spoken English and German
- Great technical skills
- Familiar with SDLC in agile and waterfall
- Quick and accurate problem solver
- Attention to detail
